We may have some older WET testing results as part of the application process as well as the permit monitoring requirement.

Subject: WET Testing on Wind River

Is the only permit that includes WET testing the Marathon Oil - Steamboat Butte permit? At least three of them have a definition for WET that refers to Section 1.3, but the permits' Sections 1.3 includes no WET requirement.

Context for this question is that I got an email from Ms. Shogren asking if the sampling results included the WET results for the permits. The only permit I could find with an explicit WET section was Steamboat Butte. And the sampling results include WET results, so I think I'm going to reply back that if the permit requires it, the WET results are in the spreadsheet. Sound reasonable?
